The refreshing drink system.

FRISCO.

The refreshing drink system.

FRISCO Hygienic Design

FRISCO Hygienic Design offers you numerous advantages:

Thanks to the patented **magnetic lock** in the lid, the container can be protected easily and safely against unauthorised access.

The **FRISCO Aroma-Cap** retains the delicious flavour of FRISCO brand drinks for as long as possible.

The **mixer** is easy to fit to the axis in the container and is magnetically operated.

The patented **sealed stainless steel base** means that your container can also be removed when full.

Thanks to the moist felt ring, the container is prevented from freezing to the cooling unit and ensures **even and very fast** cooling.

The fan motor and safety air slits mean that there is **no build-up of heat**.

Certified safety

It goes without saying that all ORANKA dispensers are strictly tested in accordance with the GS and VDE standards and have an electric cable with strain relief.

There is a **holder** in the lid for FRISCO product cards. You can therefore easily provide detailed information about the ingredients in our refreshing brand-name drinks **in accordance with the Food Information Regulations**

The liquid seal between the FRISCO containers and the lid means that the system can be sealed so that it is **virtually 100 % airtight**. You can therefore enjoy the highest quality and **maximum product freshness**.

Being able to see the drink clearly encourages people to enjoy a glass of the product.

The **patented refrigeration technology** allows the dispenser to work **with high energy efficiency** and cools the drink down quickly.

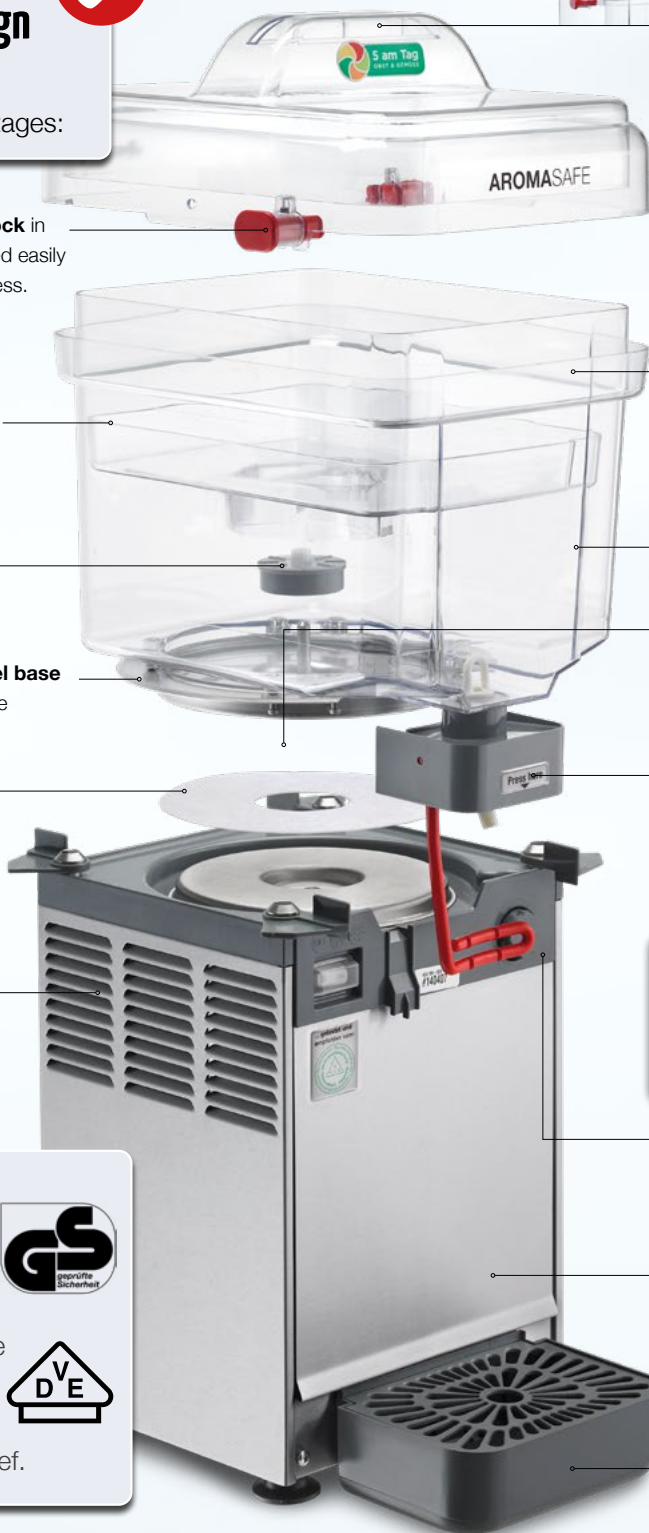

Like all the other system parts, the dispenser unit is easy to disassemble and clean. In addition, dispensing can be protected against unauthorised access by the **patented lock**.

Thanks to the high-quality, continuously adjustable thermostat, the drinks are always **at the perfect temperature** – as set by you in advance.

The strong stainless steel cooling unit is easy to use. The **safety switch (on-off)** and the temperature controller are easily accessible on the front.

Thanks to the **drip tray**, the surrounding area also stays clean.
