ORANKA Vital.
Sunshine, fruit & added value.

ORANKA Vital.

Get some sunshine in your glass.

Healthy drinking pleasure for your well-being

With every glass of ORANKA Vital, you are giving your health a boost. Because the whole is more than the sum of its parts. The innovative, balanced combination of all the ingredients and the careful manufacturing process ensure optimal nutrition and correspondingly high health benefits. In line with the Health Claims Regulation, numerous verified and scientifically accepted findings by the European Food Safety Agency (EFSA) apply to ORANKA Vital fruit drinks. And the best part: the taste will also win you over completely.

Find out more about our award-winning **product innovation** or arrange a one-to-one information meeting with an ORANKA customer manager in your area at www.oranka-vital.de. We are here to help.

ORANKA Vital. Enjoy life.

Scientifically verified benefits

Among other things, zinc contributes to normal functioning of the immune system. It also helps to maintain normal bones, hair, nails and skin and plays a part in cell division.

Vitamin C contributes to normal functioning of the immune system and nervous system and normal mental function. Vitamin C also increases absorption of iron and helps to reduce tiredness and fatigue.

Among other things, vitamin D helps...

- ... to maintain strong, healthy bones;
- ... to increase muscle mass and maintain strength;
- ... to reduce the risk of falls;
- ... to improve coordination and mobility;
- ... to lower systolic blood pressure and prevent heart failure;
- ... in its positive effect on sugar and fat metabolism (reduction in the risk of diabetes);
- ... in its anti-inflammatory effect (for immunological and allergic conditions).

Multiple scientific studies have been able to verify the numerous advantages of the right intake of vitamin D.

ORANKA Vital. You are worth it.

Sunshine in a glass with **vitamin D**

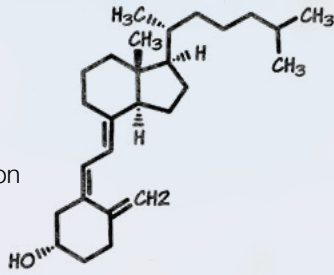

In comparison to large parts of the world, we in central Europe live in a region with little sunshine.

We therefore do not have the chance to generate our own natural supply of vitamin D. The 13th Nutrition Report of the **Deutsche Gesellschaft für Ernährung** (German Nutrition Society (DGE)) concludes in this connection: **“The vitamin D derived from eating normal foods (...) is not sufficient** to provide the amount required (...) when endogenous synthesis is low. The requirement is 20 µg/day. In other words, in addition to intake through nutrition, a supply of vitamin D is required from endogenous synthesis and/or a vitamin D supplement. If there is plenty of sunlight, vitamin D requirements can be met without taking a supplement.”

Vitamin D is an important “supporter and team player” in combination with the valuable ingredients in **ORANKA Vital fruit drinks**. Vitamin D has been shown to have a positive effect on the body and well-being (see also the box on the left).

With ORANKA Vital fruit drinks, you can easily counteract any existing nutritional deficiencies – not just in relation to vitamin D but also with the other valuable ingredients. Even one glass a day helps.

ORANKA Vital. A break for your body.
